TERMINALS: = Type A (automotive) = Type X (L, flag nut & bolt) = Type WNT (threaded stud on auto)

PART KEY: SP special.

RATINGS: CCA – Cold Cranking Amps (cranking power for 30 seconds at 0°F) are Interstate's recommended indicator of battery performance. RC – Reserve Capacity (minutes of 25 amp output at 80°F). Estimated amp-hours (20-hour rate) = RC x 0.60. CA – Cranking Amps (cranking power for 30 seconds at 32°F) are approximations only and should not be confused with CCA.

***SUBSTITUTIONS:** For footnotes, see inside back cover. **Disclaimer:** The only recommended replacements are those batteries indicated in the Applications section of this Battery Replacement Guide. With substitutions, installer should check for adequate CCA and reserve capacity and should use best judgment regarding hood clearance, proper fit, cable length, proximity of terminals to under-hood components, and polarity. Interstate Batteries denies any liability for damages as a consequence of not using or misusing this information.
